ISBN 978-3-940755-30-8

We can be assured that as children grow up and become a new adult generation, they will discover not only approved areas but also taboo areas in their environment and in life itself. In this timeframe they will be most in need of advice and supervision to prevent them from inadvertently placing themselves in risky situations. The primary preventive approach to a life skills programme on HIV/AIDS and sex education, called "Child Mind Project", can be seen as such an initiative.

More information about the project are available at: [www.htwm.de/mlindner](http://www.htwm.de/mlindner).

### From the contents:

- Psychosocial Causes of Unsafe Health Behaviour of South African Children and Adolescents
- Life Skills Interventions on HIV/AIDS in South Africa
- A Needs Analysis for Health Interventions – Case Study of Kayamandi
- Research in the Conditions of a Developing Country – Aims and Challenges
- Methodology of the Study
- The Child Mind Project – Implementation Process
- Assessment of the Programme by Health Promotion Trainers and Learners
- Results of the Outcome Evaluation
- Developing an Understanding of the Evaluation of the Proximal and Distal Context
- Discussion of Research Findings
